

Welcome to the FEMA IA – Katrina Project website area. If you are a company interested in qualifying to become a potential provider of haul and install services, you will be required to complete and submit the pre-qualification information contained in this area and submit them to [Christy.Lill@fluor.com](mailto:Christy.Lill@fluor.com).

Once completed, your pre-qualification documents will be reviewed by Fluor contracting and safety professionals. Once approved you will receive a Basic Ordering Agreement (BOA) Request for Proposal (RFP). This document will require additional and more Project-specific information (execution, pricing, etc.). Your response to this document is important as it will undergo a thorough evaluation and, if successful, you will be notified and possibly provided with a Basic Ordering Agreement (BOA) between your company and Fluor. This Agreement will form the basis of any decisions regarding possible future work on this Project. **This Basic Ordering Agreement does not guarantee your company's participation in the FEMA IA – Katrina Project.**

This website area provides links to those who can help answer questions, to forms necessary for pre-qualification, to the Project's Health, Safety, and Environmental Program, to Terms and Conditions, and to a list of current haul and install Contractors (for individuals who may want to provide their services).

### **General assistance and help with the pre-qualification documents:**

Contact: Christy Lill  
[Christy.Lill@fluor.com](mailto:Christy.Lill@fluor.com)  
(225) 391-2133
